

Student Alumni Networking Day 2016

Networking Session

Session Overview

The host will welcome students and alumni and explain the format.

President Lake Lambert will also be welcoming everyone.

Key points for the host to convey:

- Alumni will find a number on their nametag, which is their assigned table for the whole hour.
- Students will also find a number on their nametag, their table ***for the first 12 minutes***. When the bell rings, students will rotate to the table one number up from their previous table. If students have #6 on their nametag, they will rotate to table #1.
- Students and alumni should introduce themselves and network for another 12 minutes. When the bell rings again, students are free to network at any table for the rest of the session.
- Please help yourself to refreshments at any time.

Door prizes will be announced and presented before the session begins.
